

TNB-Anodyne Therapy Europe, Lda, (http://anodynetherapy.eu/index_en.html) official Anodyne Therapy products import for Europe, head quarter in Portugal, is seeking for exclusive Anodyne Therapy distributors in the different European countries with proven financial stability, a recognized commercial medical practice, and a strong sense of reliability and performance in meeting commitments to customers.

The experience with medical devices and particularly with the diabetic community and physiotherapy and network of contacts in the medical world is relevant given the innovative nature of this Anodyne Therapy System and the importance we attach to keep it in permanent evolution at the scientific community.

The treatment of DPN (Diabetic Peripheral Neuropathy) and angiogenesis (new microcirculation) are undoubtedly the areas where no other system can do what Anodyne does, and represent a great relieve for people in pain and great suffering.

Please give us more details about your potential for selling Anodyne Professional Devices to the Health Care network of Clinics, Hospitals, Physiotherapy Centers, Home Care, Seniors Centers, diabetes associations, etc ...

Best Regards,

Teresa Vasques
